

TOTAL REVENUE FOR MATERIAL SECTOR

Total revenue, Copper

Total revenue, Gold

TOTAL REVENUE FOR MATERIAL SECTOR ANALYSIS

- As we can see from the comparison above between Copper and Gold in the material sector. We can see that copper had a better revenue in all 4 years with more than \$10B above gold revenue, copper also had a bigger mean with \$18B compare to gold who had only \$4.6B, copper had a median of \$17B and gold in the other hand had \$4.3B that tell us that the copper sector had a higher average and median of total revenue than gold sector, copper had a maximum value of \$28B and minimum value of \$11.5B gold in the other hand had a maximum value of \$5.3B and minimum value of \$4.3B. So we tell now that copper have a range of \$17B and gold have a range of \$987M, So we can tell from the numbers that the copper sector has higher range, which means that the gross profit of that sector is more spread out than the gold sector who has less range and spread out. As for the standard deviation copper sector has a standard deviation of \$7B while the gold sector has a standard deviation of \$470M which mean that investing in gold sector is the wise choice since copper sector have a really high standard deviation which mean it's risky to invest there.
